Memorandum

TO: Registered Environmental Health Specialists, Program Supervisors, and Managers

FROM: Alice Isley, Program Manager
Pools, Tattoos, and State Institutions

SUBJECT: NSF Listed Swimming Pool Products

Recently, the Pools, Tattoos and State Institution (PTSI) Staff have received several questions asking why many Pentair products are no longer listed on the NSF.org website.

Attached is an explanation we requested from Pentair addressing recent changes in how they test their products.

There are many organizations that are qualified to test commercial pool equipment to ensure it meets the NSF Standard 50 required in .2518. Some of the qualified organizations are NSF, UL, Intertek, and IAPMO. If testing is performed by a third party other than NSF as meeting NSF/ANSI Standard 50 requirements, the equipment may not be listed on NSF.org. Pentair has provided the attached verification that their NSF approved products have met NSF/ANSI Standard 50 requirements through third party testing.

This guidance should be used moving forward and supersedes all previous guidance on this topic. Contact your Environmental Health Regional Specialist if you have any further questions.
