Eff. February 1, 1976;

.1415 PROVISION OF MEDICAL CARE
The application for permit shall be accompanied by a written plan for the provision of medical care, such plan having been approved in writing by the local health director. At the time of the inspection, the structure and all supplies and equipment provided for in the plan shall be in place; and the agreements and statements provided for in the plan shall be determined to be valid. The plan shall include provisions for:

1. the name and address of a physician licensed to practice medicine in North Carolina to be responsible for the organization and delivery of emergency medical services; A signed notarized statement by the physician accepting the responsibility shall accompany the plan. He shall determine how many licensed physicians, licensed nurses, and other medical personnel shall be on duty on the premises at any particular time;

2. at least one enclosed covered structure to be used as a medical treatment center: The structure or structures shall provide at least a total of 450 square feet and shall have running water under pressure from an approved source;

3. a list of medical supplies and equipment sufficient to support reasonably anticipated medical care requirements;

4. notification of all general public hospitals within 20 miles of the mass gathering location as to scheduled dates and anticipated attendance of the mass gathering;

5. the name and address of at least one licensed ambulance service agency to be responsible for providing emergency transportation; A signed notarized statement by an official of the agency accepting the responsibility shall accompany the plan.

Eff. February 1, 1976;
Readopted Eff. December 5, 1977;
Amended Eff. September 1, 1990.

.1416 WATER SUPPLY
(a) There shall be provided a water supply from an approved source. An approved emergency source shall be provided in addition where necessary. Facilities approved by the Department for the distribution and dispensing of water shall be provided. The sponsor shall have in his possession, at the time of inspection, the reports of bacteriological and chemical examinations of water samples performed by the Division of Laboratory Services or another laboratory certified by the Department to perform such examinations. The water shall be chlorinated so as to provide a free chlorine residual of at least 1.0 part per million at all outlets at all times during the gathering. The water supply and the facilities for distribution and dispensing shall be provided with effective safeguards to prevent the introduction of hallucinogenic drugs or other contamination.

(b) If water is to be provided only for drinking and washing, water shall be supplied at a rate of three gallons per person per day and a peak hour demand of one and one-half pints per person. If water is to be provided for drinking, washing, and bathing, water shall be supplied at a rate of 12 gallons per day per person and a peak hour demand of six pints per person.

(c) Water shall be obtained from a public or community water supply approved by the Department. If a new source of water supply is to be provided, the application shall be accompanied by the necessary plans, engineer's report, and specifications (in triplicate) as required for review and approval by the Department. The application shall include plans, engineer's report, and specifications for an emergency source capable of supplying at least three gallons per day per person. If water is to be hauled from an off-site source, storage facilities shall be provided in the area sufficient in volume to supply the needs of the gathering for its duration. Before being filled with water for use during the gathering, all such storage tanks shall be cleaned thoroughly, filled with clean water containing a chlorine residual of at least 100 parts per million, and, after a contact time of at least 24 hours, all such tanks shall be
emptied. Subsequently, and prior to the issuance of a permit, all such tanks shall be filled with water from an
approved source and all inlets to such tanks shall be closed and locked so as to give positive protection against the
introduction of contamination.
(d) Water outlets shall be provided at an adequate number of convenient and readily accessible locations properly
distributed throughout the activity and camping areas.

Eff. February 1, 1976;
Readopted Eff. December 5, 1977;

.1417 TOILET FACILITIES: SEWAGE DISPOSAL
(a) Sanitary toilet facilities shall be provided at convenient and readily accessible locations properly distributed
throughout the activity and camping areas at a rate of not more than 100 persons per toilet seat.
(b) If chemical toilet rental service is to be employed, all toilets shall be so located as to be readily accessible by
service vehicles and shall be serviced as often as necessary. Material removed from such toilets shall be disposed of
in a public or community sewerage system, or in a disposal trench to be constructed in the area. Each load of
material deposited in such trench shall be covered immediately with earth or lime. At the end of each 24-hour
period, the material shall be covered with a layer of at least six inches of earth.
(c) If trench latrines are to be used, all trenches shall be covered with fly-tight seat boxes with hinged lids.
(d) If water-carried sewerage facilities are provided, the sewer system shall be connected to a public or community
sewerage system having wastewater treatment facilities of adequate capacity to treat the flow of wastewater from the
mass gathering. The application shall be accompanied by a signed statement by the Division of Environmental
Management attesting to the adequacy of the treatment facilities. A similar statement shall accompany the
application if material removed from chemical toilets is to be disposed of in a public or community sewerage
system. No sewage shall be discharged to the surface of the ground or into any watercourse without the approval of
the Division of Environmental Management.

Eff. February 1, 1976;
Readopted Eff. December 5, 1977;
Amended Eff. September 1, 1990.

.1418 SOLID WASTE COLLECTION AND DISPOSAL
(a) Facilities shall be provided for all solid wastes to be collected and stored in leak-proof, nonabsorbent containers,
and all solid wastes shall be removed daily or more often and disposed of in a community solid waste disposal
facility or in a sanitary landfill to be constructed in the area. Solid wastes shall be placed in the landfill, compacted
as densely as possible, and covered after each day of operation with a compacted layer of at least six inches of dirt.
(b) Approved receptacles having a maximum capacity of 32 gallons shall be provided at places conveniently located
throughout the activity, camping and parking areas, and at each food service facility for the deposition of solid
wastes.
(c) If bulk solid waste storage containers are used, at least two four-cubic-yard containers shall be provided per
1,000 persons in the case of once-daily removal, or two two-cubic-yard containers per 1,000 persons in the case of
twice-daily removal, and these containers shall be so located as to be accessible to solid waste service vehicles.

Eff. February 1, 1976;

.1419 FOOD DISPENSING
(a) Sanitary food dispensing facilities shall be provided at accessible and convenient locations, and shall be
maintained in a sanitary condition.
(b) Perishable food items dispensed from such facilities shall be limited to prepackaged items, such as wrapped
sandwiches, prepared in commercial establishments and under official sanitary supervision, and shall be dispensed
in the unbroken packages; provided, that chicken, hamburgers, and frankfurters obtained from approved sources
may be cooked and packaged at the site if all operations of preparation, cooking and packaging in unit packages for
dispensing to individuals are done inside an approved structure or vehicle, in a sanitary manner, and otherwise in compliance with the "Sanitation of Restaurants and Other Foodhandling Establishments," .2600. Perishable foods shall be stored at or below 45 degrees F., or in the frozen state, until heated or cooked immediately before serving.

Readopted Eff. December 5, 1977;
Amended Eff. September 1, 1990.

.1420 INSECT AND RODENT CONTROL
There shall be no fly or mosquito-breeding places, rodent harborage, or undrained areas on the premises. Necessary measures shall be taken to control flies, mosquitoes, rodents, or other vermin.

History Note: Authority G.S. 130A-257;
Eff. February 1, 1976;

.1421 POST-GATHERING CLEAN-UP
Within one week after the end of the gathering, all sanitary landfills and any trenches or pits used for sewage and liquid waste disposal shall be covered with at least two feet of compacted earth material; and the areas and immediate surrounding properties shall be cleaned of all litter and solid wastes attributable to the mass gatherings. In addition, any signs, litter, and solid wastes on roads leading from the areas and within one mile of the areas and which can be attributed to the mass gathering shall be removed. All solid wastes shall be disposed of as provided in .1418 of this Section. Unless otherwise directed by the owner of the property, all temporary facilities (such as solid waste receptacles and signs) shall be removed from the areas.

History Note: Authority G.S. 130A-257;
Eff. February 1, 1976;

.1422 NOISE LEVEL AT PERIMETER
The application shall be accompanied by detailed plans for amplifying equipment, which shall be so located and operated as to limit the noise level at the perimeter of the site to no more than 70 decibels on the A scale of a sound level meter which meets the specifications of the American National Standards Institute, which are adopted by reference in accordance with G.S. 150B-14(c). The applicant shall include a signed statement certifying that the noise level limit as herein specified will not be exceeded.
