In accordance with North Carolina General Statute 130A-335, 130A-335.1, and 15A NCAC 18A .1954, an application by Johnny Estep Bio Weir Filters, Inc. for approval of septic tank effluent filters has been reviewed and the above referenced filter model has been found to meet the requirements established by statute and rule for approved effluent filters, when the following conditions for use, installation, operation and maintenance are met:

I. Description:

   a. Filters shall be designed and manufactured in accordance with plans, specifications and supporting documents provided by the manufacturer in their application for approval submitted to the On-Site Wastewater Section. The On-Site Wastewater Section shall be notified in writing of any additions or modification to the approved filter models prior to use in septic tank systems.

   b. Filters shall meet the following specifications (see Table 1):

<p>| Table 1. Approved Filter Model Specifications (Bio Weir) |</p>
<table>
<thead>
<tr>
<th>Filter Models</th>
<th>Size</th>
<th>Support Case(^1)</th>
<th>Case Dimensions</th>
<th>Min. Tank Liquid Depth Required</th>
<th>Min. Access Opening Size(^2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>D/F</td>
<td>3” x 19”</td>
<td>4” Schedule 40 PVC Pipe</td>
<td>Above Liquid Level: 5”</td>
<td>Below Liquid Level: 14”</td>
<td>36”</td>
</tr>
</tbody>
</table>

Notes:

1. Support case provided by Bio Weir.

2. Other minimum opening sizes or configurations proposed by the septic tank manufacturer shall be approved by the State on a case-by-case basis if documentation is provided showing both adequate access is provided for filter maintenance and for pumping the tank outlet compartment.

c. This approval shall be amended to incorporate additional filter models when they are found to meet the requirements of GS 130A-335, 130A-335.1, and other applicable rules.

II. Use:

A septic tank manufacturer may use one or more of these approved effluent filters in one or more of their septic tanks. The septic tank manufacturer must notify the On-Site Wastewater Section in accordance with Rule .1953 of the tanks in which they propose to utilize any of these approved filters, showing any modifications to the approved tank plans which may be necessary to utilize the proposed filter.

III. Sizing:

Approved filter models may be used in systems that meet the capacities and wastewater characteristic limitations stated in the following table, in accordance with manufacturer’s specifications:

<table>
<thead>
<tr>
<th>Table 2. Filter Sizing Criteria (Bio Weir)(^1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Filter Model</td>
</tr>
<tr>
<td>D/F</td>
</tr>
</tbody>
</table>

Notes:

1. Sizing based on typical residential strength septic tank effluent (with or without garbage disposals), including effluent CBOD\(_5\) \(\leq 300\) mg/l; TSS \(\leq 150\) mg/l; TKN \(\leq 150\) mg/l; Oil & Grease \(\leq 25\) mg/l.
The filter sizing must be compatible with tank sizing requirements established based upon Rules .1949 and .1952(d). Both the maximum filter design flow and the maximum tank design flow must be equal to or greater than the maximum design flow rate for the system.

IV. Installation:

The effluent filters and filter support cases shall be assembled and installed in accordance with filter manufacturer’s specifications and applicable rules. The filter case shall be located in such a manner that the filter can be readily accessible by the operator beneath the access manhole opening and removable by hand from above finished grade, while also providing enough room to allow for pumping of the tank outlet compartment.

V. Operation and maintenance:

The effluent filters shall be used and maintained in accordance with filter manufacturer’s specifications and applicable laws and rules. Manufacturer-specified procedures shall be followed to minimize the bypass of unfiltered effluent while the filter is being serviced. Debris washed off the filter during servicing must be returned to the septic tank, or otherwise handled in accordance with an alternate approved sanitary disposal method.

VI. Literature:

The filter manufacturer shall furnish with each filter:

- Literature to be provided by the tank manufacturer to the system installer describing installation procedures.
- Literature to be provided by the installer to the system owner/user describing filter and recommended maintenance and servicing procedures.

VIII. Maintaining approval status:

The approval status is governed by Rule .1954(e).
