Subject: Approval of Flow Equalization Panel

Dear Mr. Valentine:

On December 14, 2004, we received the submittal package for the Control Panel to be used with Flow Equalization. On March 23, 2005, we completed inspection and testing for the control panel and found that it meets the requirements of Innovative Approval #IWWS 2004-01.

Therefore, we approve the following model number for flow equalization control panels:

SEPRAB124-AJLR

Please be aware that these panels are subject to periodic inspections, and should units be found to be in noncompliance with the submission or Innovative Approval, then the approval may be suspended or revoked. Please feel free to contact me if you have any questions pertaining to this approval.

Sincerely,

Tricia Angoli
